JOB APPLIED FOR POSITION

Python Developer

WORK EXPERIENCE

(01-2023 – Present)   Python Instructor at RIT Kosovo (A.U.K)

- Developed and curated comprehensive instructional materials, encompassing Advanced Python, and (OOP) concepts. These materials included meticulously crafted lectures and innovative projects.
- Provided advanced-level instruction to students, offering an extensive range of topics / libraries that encompassed the Python programming language, advanced Python techniques, Django web development, as well as expert guidance in database management utilizing MongoDB and SQLite.

(2021 – Present)   Freelancer

(02-2022 – 04-2022)   Data Analyst at USAID Project

- Manipulation with data and finding accurate percentage .
- Cleaning data that aren't important and giving detailed report over data.

(01-2021 – 03-2021)   Google Docs developer at USAID Project .

ADDITIONAL INFORMATION

Projects   All my project you can find here (https://github.com/Enesjashari/Portfolio-Projects)

- Nes Magazine is my lastest project created using Django and Python , you can view project code in the link above and you can view it online here. (https://nesmagazine.pythonanywhere.com/)

- Time table Software is a GUI project created using Python libraries , Users input a file path, select a year and department, and click "Display" to show filtered courses. Double-clicking adds courses to a "Warnings" list (up to six). "Clear" resets inputs and outputs, and "Save" writes selected courses to "sampledata.csv".

- Liveweather is a Python/Django app that provides real-time weather information for any location. Its user-friendly interface offers accurate data on temperature, humidity, wind speed, and more. Check it out at (https://liveweather.pythonanywhere.com/)
