Professional Experience

Full-Stack Engineer at Green Technologies   Boston, USA
Development and Team Leading   March 2022 - Present

- Coding End-to-End platforms and administration systems including permission restriction .
- Develop Smart Bots to control overall User and System performance ,plus system automation.
- Creating Software architecture to perform SMTP , RE Patterns, OpenAI API-s, Web Scraping.

Programming TDI Instructor RIT(A.U.K)   Kosovo
Software Development - Technology University   Feb 2023 - Present

- Designed & adapted materials from the latest version of Python , Java , Django, Kotlin.
- Created innovative projects together with students using Python and it's powerful modules
- Build powerful fundamentals for beginner and developed strong coding techniques ,problem solving, critical thinking and real world project .

Data Analyst at USAID   Kosovo
Data Science Department   Feb 2022 - Apr 2022

- Flirting of irrelevant data and processing visualization based on relevant data
- Data visualization and their interpretation using Python, Graphs, Charts, Confusion Matrix, Diagrams, Histograms, Heatmaps

Education

University of AAB
Bachelor of Computer Science - Software Engineering   2023/Present

Tech Stack

- Python
- Java
- Javascript/JQuery
- Html & Css

- Web Scraping
- Django
- Requests
- Bootstrap 5

- Numpy
- Tkinter
- API
- OpenAI

- MongoDB
- MySql / Sqlite
- OpenAi
- RESTful API

Certifications

- Certified in Artificial Intelligence — January 2024
- Certified in Big Data Analytics — July 2023
- **PCAP** Certificate - Python Institute (Centre Road, Wilmington, USA) — March 2023
- CISCO Academy Orientation — March 2023
- Certified in Machine Learning — February 2023
- Scientific Computing with Python — December 2022
- ICT & Digital Skills Training on Python — July 2022

Projects

- Quote API (https://quoteapi.pythonanywhere.com)

- Nes Magazine(https://nesmagazine.pythonanywhere.com)

- Wifi QR Code (https://wifiqrcode.pythonanywhere.com)

- Weather App (https://liveweather.pythonanywhere.com)

- University Software (https://github.com/Enesjashari)

- Machine Learning Cryptocoins Predictions

- "Sky" E-commerce platform

- Locum Tenet (Hospital Platfrom - locum-providers.com)

- E-Banking API(API Key Security Feature, Real Time Data Control & MySql)
