Professional Experience

Senior Full-Stack Engineer at Locum Providers   Massachusetts, USA
Programing Departament   Jan 2022 - Present

- Coding End-to-End platforms and administration systems including permission restriction, closing security vulnerabilities .
- Develop Smart Bots to control overall User and System performance, System Automation, Cooldown Security System (Bank System) using Django & Python Stack libraries .
- Creating Software architecture to perform SMTP , RE Patterns, OpenAI API-s, Web Scraping.
- Optimizing code for better performance such as error handling, and bug fixing , Prevent CSRF Attacks & SQL Injections.

Programming Instructor at A.U.K TDI   Kosovo
                                                            Feb 2023 – Oct 2024

- Designed & adapted materials from the latest version of Python , Java , Django, Kotlin ,Web Development , API , React , Android Studio.
- Created innovative projects together with students using Python and it's powerful modules
- Build powerful fundamentals for beginner and developed strong coding techniques ,problem solving, critical thinking and real world project .
- Via API Development Training, we created a Demo Version of BPB Bank API in collaboration with programming department of BPB .
- Using Web Development Training , in collaboration with students created multiple projects, (Personal Portfolio , News Portal , FA2 , CRM Templates , Weather API etc) .

Head of Technology Departament at Greentechnologies   Germany
Team Leading in Programming Departament   Feb 2022 – Dec 2024

- Develop project plans, establish timelines, and location scout with colleagues in order to meet milestones efficiently.
- Separating tasks to appropriate team members according to their experience and project requirements/categories

Data Analyst on Local Project at USAID   Kosovo
Seasonal project position   Feb 2022 - Apr 2022

- Flirting of irrelevant data and processing visualization based on relevant data .
- Data visualization and their interpretation using Python, Graphs, Charts, Confusion Matrix, Diagrams, Histograms, Heatmaps

Education

University of AAB
Bachelor of Computer Science - Software Engineering   2023/2026

RESUME

Tech Stack

- Python
- Java
- Javascript/JQuery
- Html & Css
- React

- Django
- Web Scraping
- Requests
- Bootstrap 5
- Cyber Security

- Api
- ResfulAPI
- Numpy
- Tkinter
- Php

- MongoDB
- MySql / Sqlite
- OpenAi
- Problem Solving

Certifications

- Certified in Artificial Intelligence   January 2024
- Certified in Big Data Analytics   July 2023
- **PCAP** Certificate - Python Institute & Open EDG Institute   March 2023
- Cisco Instructor Certified   March 2023
- Javascript Fundamentals   March 2023
- Certified in Machine Learning & algorithm   February 2023
- Scientific Computing with Python Certificate   December 2022
- ICT & Digital Skills Training on Python   July 2022
- Community Youth Mapping and Research Report   2020/2021
- Community Youth Mapping and Research   2021/2022

Projects

- Locum Providers (https://locum-providers.com/login)

- Quote API (https://quoteapi.pythonanywhere.com)

- Nes Magazine(https://nesmagazine.pythonanywhere.com)

- Wifi QR Code (https://wifiqrcode.pythonanywhere.com)

- Weather App (https://liveweather.pythonanywhere.com)

- Hospital Patient Database Management using MySQL/SQLite

- Timetable Software Software (https://github.com/Enesjashari)

- Machine Learning Algorithms to predict

- Video Downloader Software

- Machine Learning Cryptocoins Predictions

- Car Sensor Detector

- CRUD App

- "Sky" E-commerce platform

- E-Banking API(API Key Security Feature, Real Time Data Control & MySql)
